What is EducationAI?

EducationAI is a modern, AI-powered School Growth Platform designed to help institutions run smarter, faster, and with measurably higher parent trust. It brings every school operation — academics, attendance, finance, HR, communication, and institutional reporting — into one connected system, so leadership teams can drive real results rather than chase paperwork.

Built for Every School Type

- ★ Single campuses needing structure
- ★ Growing school groups wanting central control
- ★ Budget-conscious schools that want results without hardware
- ★ Digitally ambitious institutions ready for full automation

One Platform. Every Function.

- ★ Replace 10+ disconnected tools
- ★ AI where it matters most — attendance & reporting
- ★ Enable only the modules your school needs
- ★ Expand branch by branch at your own pace

How We Are Different

Traditional Systems	EducationAI Way
Biometric machines required	Photograph existing register — AI does the rest
Pay for 50 modules, use 5	Enable only what you need — pay for what you use
Separate apps for each function	One platform across all departments
One branch = one separate system	True multi-branch: switch in one click
Manual attendance correction lost	Self-learning: every correction improves accuracy
Parent portal = one-way notification	Two-way: messaging, leave requests, live status

USE CASES

Real Scenarios. Real Impact.

EducationAI is designed around how schools actually operate day-to-day. Here are five scenarios where the platform delivers measurable improvement.

A

School Owner Scaling Operations

A growing school group needs consistent operations across campuses. EducationAI delivers centralized visibility with branch-level flexibility, so management can expand without losing governance or data control.

B

Principal Improving Daily Discipline

A principal wants attendance risk, academic flow, and fee status in one place to act early. The platform provides a unified operational view so interventions happen faster and performance improves measurably.

C

Accounts Office Improving Fee Collection

The accounts team wants cleaner fee operations, fewer manual follow-ups, and predictable cash flow. EducationAI streamlines collection workflows to reduce leakage and speed up period-end reconciliation.

D

Parent Trust and Communication

Parents expect transparent updates and quick responses. EducationAI strengthens the school–parent relationship through structured two-way communication, live status visibility, and responsive workflows.

E

Admissions and Student Retention

Schools want better inquiry conversion and stronger retention through service quality. EducationAI supports a more consistent student journey from first enquiry all the way through ongoing engagement and academic progress.

BENEFITS

Everyone Wins. Every Role.

EducationAI is built with every stakeholder in mind — from the school owner setting strategic direction to the parent checking on their child's attendance.

School Owners

- Lower software sprawl
- Better control across all departments
- Scalable branch management

Principals

- Faster oversight and intervention
- Better accountability across teams
- Improved school-wide execution

Admin & Accounts

- More organized workflows
- Reduced manual effort
- Cleaner records and reporting

Teachers

- Less repetitive admin work
- Better process support
- More time for teaching quality

Parents

- Better visibility and communication
- Faster response cycles
- Greater institutional trust

AUTOMATIONS

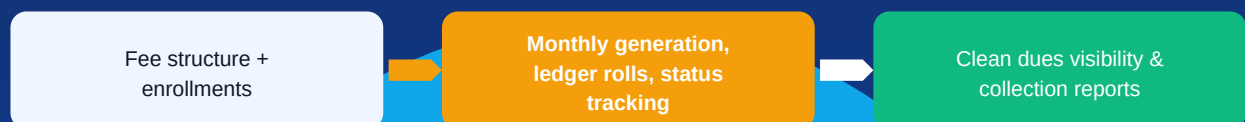

Automations That Save Hours Every Week

EducationAI automates the most time-heavy workflows in school operations, so your team can focus on outcomes — not repetitive manual tasks. Every automation is designed to run reliably, with human oversight built in where it matters.

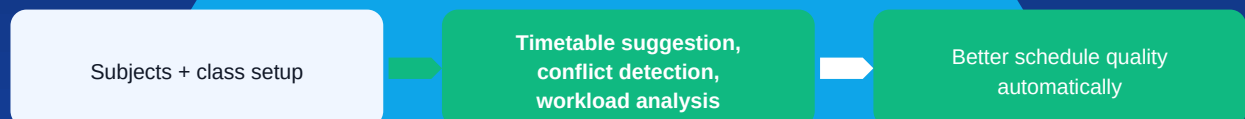

Attendance Automation

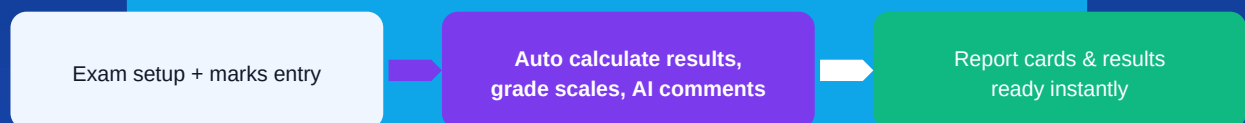

Fee Operations Automation

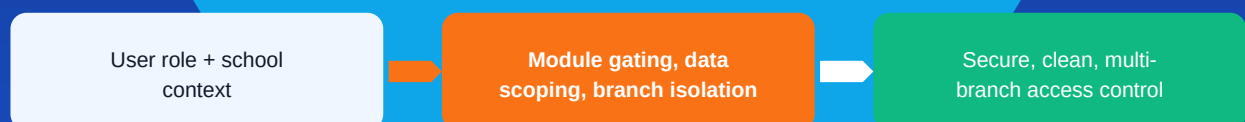

Academic & Timetable Automation

Exam & Report Card Automation

Multi-Branch Governance Automation

PRICING

Simple, Modular Pricing

Start small. Pay only for what you need. Expand module by module as your school grows. No hidden fees. No long-term lock-in. No hardware investment required.

A | Base Platform (Required)

Includes school setup, user and role access management, basic reporting foundation, and platform support.

Starter

Up to 400 students

Core setup · User roles · Basic reports

5,000

PKR / month

Growth

401 – 1,000 students

Core setup · User roles · Full reports

8,000

PKR / month

Scale

1,001+ students

Core setup · All roles · Priority support

12,000

PKR / month

B | Module Add-ons (PKR 3,000 – 5,000 / month each)

Schools select only the modules they need. Any module can be added or removed at renewal.

Smart Attendance

5,000

PKR / month

Academics & Time

4,000

PKR / month

Exams & Results

4,000

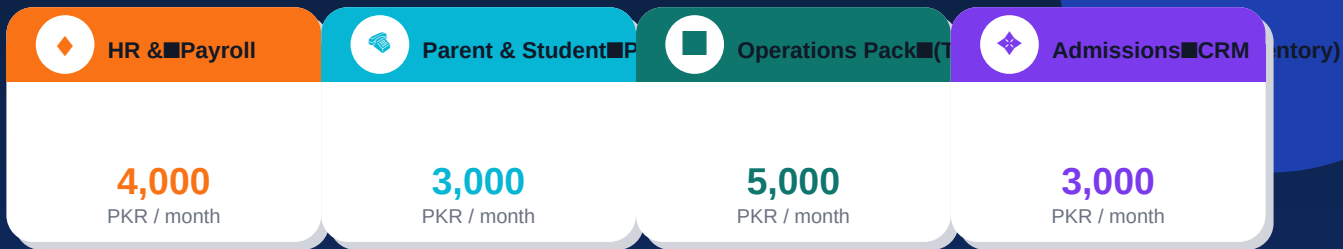

PKR / month

Finance & Fee Management

5,000

PKR / month

■ Example: Starter base (5,000) + Smart Attendance + Finance + Exams + Academics = PKR 23,000/month for a full-featured, growing school.

FAQ

Frequently Asked Questions

? Do schools need attendance hardware?

We support both models. Schools can use AI-powered attendance from a simple register photograph — no hardware required. Alternatively, schools ready for fully digital classrooms can use our face recognition attendance mode that runs from an installed camera.

? Can schools subscribe to selected modules only?

Yes. The model is fully modular. Schools start with the base platform and add only the modules that match their current priorities and budget.

? Can we add more modules later?

Absolutely. Modules can be added at any point without any platform migration or data migration. Your existing data is always safe and accessible.

? Is this suitable for school chains or groups?

Yes. EducationAI is purpose-built for multi-branch school groups. It supports centralized oversight with branch-level control, and each branch can have its own independent module configuration.

? How long does onboarding take?

Most schools are operational within one day. There is no hardware installation, no complex infrastructure, and no need to change existing school workflows on day one.

? Is there a long-term contract?

No. Subscriptions are monthly with no minimum lock-in period. Schools can scale up, scale down, or pause modules as their situation changes.
